Payroll Fact Sheet

Are you ready for Automatic Enrolment?

The introduction of Automatic Enrolment has already started and will affect every single employer in the UK over the coming months and years. When your staging date 'hits', you will be required by law to automatically enrol any eligible employees into a work place pension scheme when your payroll is run.

Our payroll software is fully Auto-Enrolment compliant and will be able to advise you which of your employees is eligible for enrolment and make the necessary deductions from wages, notifying you of the amount you need to pay over to your pension provider.

The cost of this service will be 50p per employee per month.
